ENTEROBIUSVERMICULARIS (OSSURI) (SCOTCH TEST)

COLLECTION METHOD

REQUIRED MATERIALS:

- A screw-cap container, with preservative*
- Cotton swabs*

* Available free of charge, exclusively at your chosen sample collection point.

SAMPLE COLLECTION:

- Take the sample in the morning before relieving yourself and before washing;
- **Thoroughly** rub the perianal area with a clean cotton swab;
- Dip the stick into the container (if it is a long cotton swab, break it to length) and leave it there;
- Close the container tightly;
- Repeat the procedure for 3 consecutive days, placing the cotton swabs in the same container.

STORAGE:

The container must be stored at room temperature, away from light, and **out of the reach of children**.

Deliver the container to your chosen collection point during opening hours.
