SPERM CULTURE

COLLECTION METHOD

Required materials:

- A sterile, wide-mouthed container, available free of charge at your chosen collection point or purchasable at a pharmacy.

SAMPLE collection:

- After urinating, thoroughly wash your external genitalia;
- Collect semen by masturbation directly into the container. Collect all the semen emitted.

N.B.: Do not collect semen using a condom, as the spermicidal substances found therein can interfere with the test.

Deliver the material to your chosen collection point during opening hours, **within 2 hours of collection.**
